

INVENTORY MANAGEMENT SYSTEM

OVERVIEW

The **Inventory Management Software** is designed specially to meet the prerequisite of medium sized and corporate enterprises. A well organized business house needs to maintain well-timed and accurate information about receipt of goods, sale & purchase, disposition, goods transfer, and status of stock at one point of time. A precise inventory control system is required to deal with the above operations smoothly and accurately.

The screenshot displays the 'Stockroom' application interface. On the left is a sidebar with three menu items: 'Stockroom' (represented by a stack of boxes), 'Device Management' (represented by a mobile phone), and 'Settings' (represented by a document with a checkmark). The main content area is titled 'Stockroom' and contains two action buttons: 'Upload' and 'Export'. The 'Upload' button is accompanied by the text 'Click the upload button to retrieve data from the connected portable device'. The 'Export' button is accompanied by the text 'Click the export button to export the inventory data to a file'. Below these buttons is a table with the following data:

	Item ID	Location	Description	Quantity	Portable Quantity	Summi Quanti
▶	A002	AA001	Dell PC	10	0	10
	A003	AA001	HP iPAQ	14	0	14
	A004	AA001	Apple iPOD	20	0	20
	A005	AA001	Phillips TV	22	0	22
	A006	AA001	Zebex PLD-20	9	0	9
	A007	AA001	Psion Techlog...	2	0	2
	A008	AA001	PSC Falcon 4...	18	0	18
	A009	AA001	acer AL1912	5	0	5
	A010	AA001	BT Dllcor 1200	17	0	17
